

Blackminster Middle School

"Turning Potential into Success"

An extract from Blackminster Middle School's website...

June 2009

As part of our Extended Schools provision we have agreed to have The Life Channel TV system set up in school. This will be our own in house TV channel with screens in key areas plus a link to every interactive white board in the class rooms.

It will combine our news with information about community events and public information films. Coupled with our new "text to home" service it will make our media links much faster.
